DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, drawn to a product of liquid composition containing a solvent and a hydrophobic colloid.

Group II, claim(s) 4-6, drawn to a product, namely a recording liquid containing a pigment, a solvent and a hydrophobic colloid.

Group III, claim(s) 7-9, drawn to a liquid cartridge apparatus serving as a recording liquid source.

Group IV, claim(s) 10-14, drawn to a liquid spraying cartridge apparatus with a liquid container.

Group V, claim(s) 15-19, drawn to a liquid spraying apparatus with a spraying means, a liquid cartridge, and a liquid container.

Group VI, claim(s) 20-22, drawn to a process (method of spraying recording liquid onto an object).

2. The inventions listed as Groups I, II, III, IV, V, & VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The groups listed above are not within the permitted combination of different categories of inventions. Currently there are two products, three apparatuses, and one process. As set forth in the PCT/ISA/210 form, there is

Art Unit: 2861

no special technical feature that defines a contribution over the prior art (EP 1247847 A2, JP2002-338863 A, JP2002-332437 A, JP2002-332438 A, JP2002-20656 A, JP 8-60059 A, JP2002-294117 A, & JP2001-192582 A).

3. Upon election of invention I, II, III, IV, V, or VI, the applicant is further required to elect one of the following disclosed species. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- A. The material making up the hydrophobic colloid is alumina.
- B. The material making up the hydrophobic colloid is cerium oxide.
- C. The material making up the hydrophobic colloid is barium oxide.
- D. The material making up the hydrophobic colloid is iron hydroxide.
- E. The material making up the hydrophobic colloid is a specifically listed mixture.

4. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement (e.g., I and A), and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered *nonresponsive* unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 2861

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: As set forth in the PCT/ISA/210 form, there is no special technical feature that defines a contribution over the prior art (EP 1247847 A2, JP2002-338863 A, JP2002-332437 A, JP2002-332438 A, JP2002-20656 A, JP 8-60059 A, JP2002-294117 A, & JP2001-192582 A).
